Objectives of MOU:

Exposure to Real-World Working Environments, Understanding Industrial Processes, Enhancing Technical Knowledge Learning About Industry Standards, Interaction with Industry Experts, Bridging the Gap Between Theory and Practice, Developing Professional Skills

Career Orientation

Outcome of MOU: Practical Exposure Learning experience, Understanding of Processes,

Awareness of Industry Challenges, Enhanced Learning. Electrical control panels are a collection of devices that use electrical power to control industrial equipment. These panels are used to maintain orderly control over industrial equipment to achieve multiple mechanical goals. The closed metal box has two main parts the Panel structures and Electrical Components. Panels can be programmed to constantly monitor your industrial controls, enhancing the automated processes throughout facilities. Custom control panels are made to suit your unique needs. Develop a simple relay system or opt for a more complex industrial control panel; our certified technicians can do it all. panels are *waterproof*, so they can be implemented both inside and outside your professional space. Electrical control panels will streamline your production process, allowing you to focus on separate professional concerns.
