

Department of Computer Engineering

Program Outcomes (POs)(PG)

Students are expected to know and be able to:

1. Apply in-depth knowledge to evaluate and analyze complex engineering problems critically.
2. Find feasible and optimal solutions of complex engineering problems by considering societal and environmental factors.
3. Extract information to unfamiliar problems through researching the literature, apply suitable research methodology, techniques and tools for the development of projects, its finance and management.
4. Adapt the usage of modern tools, software and to keep in touch with current technologies and inculcate investigative culture, to complex engineering activities with an understanding of limitation.
5. Develop research attitude and multidisciplinary approach to demonstrate a capacity for self-management and teamwork to achieve common goal.
